

Environmental policy

Independent Line Services is committed to becoming a leader in displaying environmental responsibility in all areas of its business. We have implemented an environmental policy and management system, which focus on these objectives:

- Ensure Independent Line Services better understands the environmental needs of its clients.
- Consider environmental objectives fully in our business planning and operations.
- Reasonably avoid, minimise and mitigate potentially adverse environmental effects.
- Aim to provide clients and sub-contractors with a working environment that promotes good health, energy efficiency and resource conservation
- Provide information on environmental and energy efficient aspects of our work to clients and the wider community
- Encourage clients, staff and sub-contractors to have pride in our community's physical environment and continually apply industry best practice in protecting our environment.
- Conserve our resources and to show leadership and commitment to sustainability by adopting responsible environmental practices
- Encourage our partners, suppliers and contractors to act with a sense of environmental responsibility
- Aim for Independent Line Services to continuously improve its environmental performance
- Contribute to a co-ordinated approach to sustainable development within the community.
- Expect all management, staff and contractors to be personally committed to achieving our environmental objectives.
- Recycle as many materials as possible, such as but not limited to; Wooden Poles, Crossarms, Steel, Copper, Aluminium, and Insulators.

The environmental policy and objectives are carried out through a detailed annual Environmental Management Plan. This outlines requirements in all the tasks and projects undertaken to meet the policy objectives.
